Picture above is from 1500mm Size
Also available in 1800mm

Slim Glass Basin Top:
Picture is from 1200mm Size
Also available in 900mm

How to Calculate the price of what I want?

1st) Find the style of basin top you like. Choose size you need on page 1, check it's price on page 6, we call it BASE PRICE. In this example we use the Ceramic Top 900mm Vanity, and it's BASE PRICE is \$365

2nd) Decide whether you want Polyurethane Finish or Color Panel Finish on the Cabinet.

OPTION: POLYURETHANE, you can choose any colour from DULUX, and you can choose HIGH GLOSS, SEMI GLOSS or MATT on the finish. For each vanity unit regardless it's size, each one will cost an extra \$150. For each additional vanity (assume same colour), \$100 extra.

OPTION: COLOR PANEL

Laminex Colour Panel: Colour from above page each cabinet extra \$120. (NOTE: Gloss Finish Extra)

Polytec Colour Panel: Colour from above page each cabinet extra \$100

Formica Colour Panel: Colour from above page each cabinet extra \$100

3rd) Add BASE PRICE with the extra price of the finish you want.

Example, you decided to go with Polytec Color Panel $\$365 + \$100 = \$465$

Example, you decided to go with POLYURETHANE HIGH GLOSS GREY, $\$365 + \$150 = \$515$

Last, you get a unique style vanity which looks like custom made, but with only 1/2 the price.
